Profile

Driven by a long-standing passion for computer programming, I bring robust expertise in object-oriented programming (OOP). My professional journey involves contributing to diverse application development across desktop, web, and mobile platforms. Adapting to new technologies seamlessly is a skill I consistently hone. Fuelled by a curiosity for research, learning, and innovation, I perpetually evolve in this dynamic field. I prioritize active listening and strong interpersonal skills to foster effective collaboration and attain collective objectives.

Skills

- Development Software: Android Studio, NetBeans, Visual Studio.
- Programming Languages: Python, Java, JavaScript, CSS, HTML, Flutter.
- Database: PostgreSql, MySql, Oracle, SqlLite, Access and NoSql.
- Conception Software: StarUML, Gantt project.
- Design Software: Photoshop, Inkscape.
- MS Office: Word, Excel and PowerPoint.
- Extensive background in electronics engineering and IT.
- Strong skills in project evaluation and analysis.
- Strong communication and abilities of working in team.
- Analytical and problem-solving skills.
- Eager to learn new skills for personal development.
- Quick leaner and adaptable with the ability to work under pressure.
